ACID KLEN POWDER

POWDERED ACID DETERGENT

MATERIAL & FUNCTION

ACID KLEN POWDER is for use in circulation cleaning systems and other stainless steel processing equipment where acid cleaning is required.

ACID KLEN POWDER is a dust free powder yielding a colourless, odourless solution at use concentrations. It is ideally suited to the acid cleaning phase in C.I.P recirculation cleaning systems for equipment such as pasteurisers, cream treatment units, vacuum pans, concentrators, pre-heaters and other high temperature processing equipment.

ACID KLEN POWDER is a blend of inorganic acid, corrosion inhibitors and low-foaming surfactants. Rapidly acting penetration, dispersion and suspension properties are provided by this careful blend of materials and the product effectively and safely removes mineral and protein deposits not normally removed by alkaline detergents.

ACID KLEN POWDER is in powder form, so is much safer for operators to handle and more convenient to transport than liquid acids.

PACKAGING

2.5, 5, 15, 18, 20, 200 Kilograms

IMPORTANT NOTICE TO CUSTOMER

Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. ALWAYS TEST FIRST.
