## ADVANCE CHAIN CLEANER & LUBRICANT

### MATERIAL & FUNCTION

ADVANCE is a highly specialized cleaning and lubrication additive for use on chain and slat conveyor lines in the food and beverage industry.

The synthetic base of ADVANCE gives a superior slip on conveyors while exhibiting markedly reduced foaming when compared to the traditional soap based lubricants. A secondary benefit of the synthetic nature of ADVANCE is that it will not form insoluble 'soap scum' in hard water areas where many soap-based lubricants will. This lack of scum formation means there will be no blockage of line jets and no buildup of insolubles on the chain line.

ADVANCE is suitable for use in all types of packaging conveyers.

ADVANCE is suitable for use in food and meat export establishments.

### APPLICATION

ADVANCE should be diluted with water at rates of between 1:300 and 1:600, depending on the clean and lubrication required. ADVANCE should be diluted and dosed using an automatic dosing system.

### PACKAGING

20 Litre & 200 Litre drums.

### IMPORTANT NOTICE TO CUSTOMER

*Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. **ALWAYS TEST FIRST.***
