ALGAECIDE & WINTERISER SWIMMING POOL DISINFECTANT

MATERIAL & FUNCTION

This product is designed for use in the maintenance of a swimming pool during the cool winter months and reduces the need for sanitation of the pool with chlorine based products.

It is not recommended for continuous use throughout the year or when the pool is to be used for swimming. It is primarily for algae control.

APPLICATION

Initial Usage (Algae visible)

If algae are visible use 20 mL of ALGAECIDE/WINTERISER per 5,000 litres of water. This dose should be repeated within 48 hours after dead algae has been removed. Chlorinate pool as usual.

Maintenance Usage

ALGAECIDE/WINTERISER will assist chlorine to combat algae during periods of extreme heat and high ultra-violet ray levels. Use 20mls of ALGAECIDE/WINTERISER per 5,000 litres as an initial dose followed by 20 mL per 5,000 litres each fortnight or as necessary depending on usage of pool.

Shock Treatment & Black Spot

If a bad outbreak of algae occurs the following treatment programme should be adopted (in the evening).

- * Reduce pH to 5.5 with pool acid in Fibreglass Pools only. Concrete pools use Pool Drops +. Do not change PH in concrete pools.
- * Shock treat pool with ALGAECIDE/WINTERISER at the rate of 200mls per 5,000 litres.
- * Add heavy dose of Calcium Hypochlorite (Dry Chlorine) at the rate of 60gms per 5,000 litres and circulate pool water. When algae has been killed, re-adjust pH with pool alkali, super chlorinate and filter for full cycle. Generally this takes about 7 days. Do not swim in pool.

Winterising

- * Reduce pH to 5.5 with pool acid in Fibreglass Pools only. Concrete and Vinyl pools do not lower pH below 7.0. Use initial dose rate of 50mls per 5,000 litres of pool water.
- * Each month add 30 mL per 5,000 litres. If necessary dose pool monthly with dry chlorine. Filter water weekly.

PACKAGING

1 Litre & 5 Litre containers.

IMPORTANT NOTICE TO CUSTOMER

Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. ALWAYS TEST FIRST.
