BIOHIB 520

DUTY

To act as a broad-spectrum microbiocide for the control of bacteria and algae in water systems.

PRODUCT

Appearance: Colourless liquid; completely miscible in water at all concentrations.

DIRECTIONS

Recommended dosage, of Biohib 520, is 100-200ppm in process water streams. Heavily fouled systems should be initially dosed at 500ppm.

ANTIMICROBIAL PROPERTIES

Biohib 520 is a non-ionic biocide with an optimum degradation profile and is particularly effective in the control of Sulphur Reducing Bacteria. Biohib 520 is effective in preventing the growth of gram positive and gram negative bacteria and algae.

PRECAUTIONS

Avoid contact with skin and eyes.

Do not ingest.

Read Material Safety Data Sheet for detailed instructions.

PACKAGING

15 LITRE cube

200 LITRE drum

1000 LITRE bulk tank
