BIOHIB I

DUTY

To act as a broad-spectrum microbiocide for the control of bacteria, fungi and algae in water systems.

PRODUCT

Appearance: Clear pale green liquid; completely miscible in water at all concentrations.

DIRECTIONS

Recommended dosage, of Biohib I, is 100-200ppm in process water streams.

ANTIMICROBIAL PROPERTIES

Biohib I combines rapid antimicrobial activity with an optimum degradation profile and is particularly effective in the control of Sulphur Reducing Bacteria. Biohib I is effective in preventing the growth of gram positive and gram negative bacteria, moulds, yeast and algae.

PRECAUTIONS

Avoid contact with skin and eyes.
Read Material Safety Data Sheet for detailed instructions.

PACKAGING

20 LITRE pail
200 LITRE drum
1000 LITRE bulk tank
