BIOHIB RW

HALOGENATED BIOCIDES

MATERIAL & FUNCTION

Biohib RW is a broad-spectrum micro-biocide used for the control of bacteria, fungi and algae in industrial water systems.

Appearance: Off-white pellet
Material: Halogenated dialkylhydantoin

APPLICATIONS

Biohib RW is an anti-microbial product that releases bromine and chlorine. It is effective in controlling gram-positive and gram-negative bacteria, moulds, yeasts and algae in both acid and alkaline conditions

DIRECTION FOR USE

The recommended dosage for Biohib RW is a residual of 0.1 – 0.5 ppm halogen in the water system.

The MGCC service representative will determine the required and usage for each specific system.

CAUTION

Refer to the Material Safety Data Sheet for detailed safety and handling instructions.

Avoid contact with skin and eyes and avoid breathing vapour or spray mists containing this material.

PACKAGING

22.6kg drum

IMPORTANT NOTICE TO CUSTOMER

*Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. **ALWAYS TEST FIRST.***
