CW1416

Algaecide

Product Description

ENVIRONEX CW1416 is contains octyl decyl dimethyl ammonium chloride, dioctyl dimethyl ammonium chloride, dodecyl dimethyl ammonium chloride and ethanol

In a clear pale yellow solution. CW1416 is, specifically formulated for use in cooling water systems. CW1416 has superior biocidal action against a broad spectrum of microbial organisms such as bacteria, fungi, viruses and algae. It is effective in hard water and organic soil loads. This product has excellent biodispersal properties.

Product Benefits.

- Excellent bio dispersant
- Effective Algaecide
- Excellent broad spectrum biocide
- Effective in hard water
- Perform well in organic soil,
- Compatible with cooling water treatment components.

Application

ENVIRONEX CW1416 can be used

in:

- Cooling Towers
- Chillers

Features

- ENVIRONEX CW1416 is a ready to use liquid.
- Quick an effective.
- Ready to use liquid
- Prevents Slime formation
- Biodegradable

Dosage requirements

- Dose 200ml of ENVIRONEX CW1416 per 1000 liters (1m³) of system volume for open recirculation systems. Close cooling tower blowdown as long as possible to maximize efficiency.

Monitoring

- Monitor Microbiological activity as part of water management program.
- Check filters and clean regularly.

Handling and Storage.

- Read the label and Material Safety Data Sheet for complete handling information before using this product.
- CW1416 may be stored up to one year.

Quality

- ENVIRONEX International is licensed as a Quality Endorsed Manufacturing Company under ISO9001.
