CW3374

Open Recirculation Cooling System Corrosion Inhibitor

Product Description

ENVIRONEX CW3374 Open Recirculation Cooling System Corrosion Inhibitor is a Zinc-based cathodic inhibitor. It offers cost effective corrosion control in large cooling systems.

Product Benefits.

- Eliminates corrosion in open cooling water systems
- Easy to use
- Cost effective
- Extremely low maintenance
- Prevents scale and deposits.
- Stops Copper corrosion

Application

- CW3374 can be used in all open recirculation cooling water systems where zinc can be removed in the waste water treatment process.

Features

- CW3374 is compatible with Oxidizing and Non-oxidizing Biocides

Dosage requirements

- Dose 1-5ppm CW3374 based on Feed water flow rate.
- Combine with a good microbial control program.

Monitoring

- Control Zinc levels between 1 and 3 ppm in cooling water system.

Handling and Storage.

- Read the label and Material Safety Data Sheet for complete handling information before using this product.
- CW3374 may be stored up to one year.

Quality

- ENVIRONEX International is licensed as a Quality Endorsed Manufacturing Company under ISO9001.
