## CALCIUM HYPOCHLORITE Chlorinated Lime (CHLORINE 65)

### MATERIAL & FUNCTION

CHLORINE 65 is used for daily chlorination and sanitation of swimming pools. It may also be used for sanitation in the food industry and for sterilization of water although these applications are not widespread. Available chlorine is 650 gms per kg

### APPEARANCE

CHLORINE 65 is a white granule with a very strong chlorine odour.

### USES

#### Swimming pool water sanitation and sterilization of surfaces

CHLORINE 65 should be used daily as a sanitizer for chlorine swimming pools. A triple dose of recommended usage should be used for shock treatment on a weekly basis.

### APPLICATION

CHLORINE 65 should be applied at the rate of 50gms per 10,000 litres of pool water. It is best applied by adding the required dosage to a bucket of water - stir - and leave to settle for 1 hour. When product is dissolved, distribute evenly around pool - being careful to leave sediment at the bottom of the bucket. This process can be repeated to ensure all chlorine is extracted from sediment. The sediment can then be disposed of making sure that it is not put on the garden. Detailed usage instructions are available on the label.

### PACKAGING

25kg containers.

### IMPORTANT NOTICE TO CUSTOMER
