CHEMSOL 20

BRIEF DESCRIPTION

MATERIAL & FUNCTION

Chemsol 20 will control scale formation in process water systems. Chemsol 20 controls scale deposition in process water piping and heat exchange surfaces by distorting crystal growth and dispersing clay deposits.

APPLICATIONS

Process water in piping, heat exchangers. It is an effective dispersant for calcium carbonate, calcium sulfate and clays. It inhibits the precipitation of calcium phosphate and calcium phosphonate.

DIRECTION FOR USE

Consult your MGCC representative.

CAUTION

Avoid contact with skin and eyes and avoid breathing vapour or spray mist.

PACKAGING

20, 200 and 1000 Litre containers

IMPORTANT NOTICE TO CUSTOMER

*Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. **ALWAYS TEST FIRST.***
