CLEAR STONE SEALER WATER BASED CLEAR STONE SEALER

MATERIAL & FUNCTION

CLEAR STONE SEALER is an alkaline water based silicate sealer designed to prevent water staining of Limestone, sandstone and all naturally porous materials. The coating allows the surface to retain its natural look, and allows it to “breathe”, and trapped moisture can escape freely.

APPEARANCE

Clear, colourless and odourless liquid.

DIRECTIONS FOR USE:

Prior to application of CLEAR STONE SEALER, the surface should be clean and dry. Grease, oil or dirt will interfere with the effectiveness of the sealing process. Avoid contact with aluminium fittings or discolouration may occur.

Apply CLEAR STONE SEALER with a mop, spongemop, cloth or lambswool applicator.

Coverage is typically 5 m²/litre, but may vary up to 8 m²/litre for very dense surfaces. One coat is sufficient

PACKAGING

5, 20 and 20 Litre containers.

IMPORTANT NOTICE TO CUSTOMER

Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product, which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. ALWAYS TEST FIRST.
