CONCENTRATE RP 41 CONCENTRATED WETTING ADDITIVE

MATERIAL & FUNCTION

CONCENTRATE RP 41 has been formulated as an additive to liquid caustic soda solutions with concentrations in excess of 40% w/w NaOH. CONCENTRATE RP 41 is fully soluble, compatible & stable in very high concentrations of caustic soda and is designed to increase the rinseability of caustic solutions used in CIP cleaning regimes. When used with raw caustic soda solutions, a low foam formulated caustic detergent results.

APPLICATION

CONCENTRATE RP 41 is used at the rate of 1 kg per 150 kg (100L) liquid caustic soda (46%) (=1% w/v). For lesser strength liquid caustic solutions, the concentration of CONCENTRATE RP 41 can be reduced.

CONCENTRATE RP 41 should be premixed with liquid caustic soda solution using an agitator, air sparge or added to mixing vessel prior to addition of liquid caustic and allowing agitation created by addition of liquid caustic to disperse the CONCENTRATE RP 41 throughout the liquid caustic soda solution.

PACKAGING

15 Litre & 200 Litre containers.

IMPORTANT NOTICE TO CUSTOMER

Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. **ALWAYS TEST FIRST.**
