## CROSPUR 100% SOLUBLE “SOLUBOR”

### MICRO NUTRIENTS

• <b>Boron as Bo</b>	<b>25.3% w/w</b>
• Molybdenum as Mo	0.000092% w/w
• Iron as Fe **	0.013% w/w
• Manganese as Mn **	0.0068% w/w
• Copper as Cu **	0.0068% w/w
• Zinc as Zn **	0.0024% w/w

\*\* Denotes EDTA Chelated form

### APPLICATION

**For treatment of moderate and severe Boron deficiencies and should be applied as early in the growing season as possible.**

Moderate Deficiency --

Severe Deficiency -- 4 to 6 kg dissolved in 200 to 300L of water per hectare.

### ADVANTAGES

- **Dissolves completely in water.**
- Readily available for the plants and is fast acting.
- Allows fertilisation via drips, sprinklers and foliar and boom sprays.

### COMPATIBILITY

**Crospur Soluble Fertilisers are compatible with most chemical sprays. It is suggested that a test using the chemicals be done before a tank mix is prepared. To do this, mix the chemicals at the recommended rates in a small container and look for an adverse reaction eg. sedimentation, fuming.**
