## **ELECTROPOLISHING FLUID SULPHURIC/ PHOSPHORIC ACID MIXTURE**

### **MATERIAL & FUNCTION**

ELECTROPOLISHING FLUID is based on a combination of sulphuric acid and phosphoric acid which is mildly corrosive to most metals. The strong acidity of sulphuric acid is moderated by the weak acidic nature of phosphoric acid.

ELECTROPOLISHING FLUID removes rust effectively from metal surfaces

### **APPEARANCE**

ELECTROPOLISHING FLUID is a clear liquid.

### **APPLICATION**

ELECTROPOLISHING FLUID can be used in cleaning of electroplated products

### **FIRST AID**

If poisoning occurs contact a doctor or Poisons Information Centre. If swallowed do NOT induce vomiting. Give a glass of water. If skin contact occurs remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

### **PACKAGING**

200 Litre containers.

### **IMPORTANT NOTICE TO CUSTOMER**

*Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. **ALWAYS TEST FIRST.***
