HOOK OIL (CANNIS OIL)

MATERIAL & FUNCTION

HOOK OIL is a multi purpose product designed as a dewatering oil, rust preventative and lubricant for hooks, rollers and overhead rails in abattoirs and other meat establishments.

FEATURES

Effectively lubricates hooks, rollers and rails. Protects against rusting. Does not build up or form hard surface coatings and remains easy to clean and maintain. Fortified against microbiological spoilage.

APPEARANCE

Pale brown liquid.

APPLICATION

Hooks and Rollers: Dilute with water in the ratio 20:1. Add **HOOK OIL** to water with continuous agitation during mixing. Apply by brush, swab or rinse-bath application. For rinse-bath application the fluid should be changed when it shows signs of heavy soilage. Overhead rails: Apply neat by brush or swab. For best results the rails should be cleaned with an appropriate cleaner and rinsed down with water prior to application.

PERFORMANCE CHARACTERISTICS

Approved by the Department of Primary Industry and Energy as a Lubricant Type B (ie, a lubricant involving only incidental contact with food product).

TYPICAL ANALYSIS

Density @ 15 ^o C	0.9
Flash Point COC ^o C	205
Pour point ^o C	-9

PACKAGING

20 Litre & 200 Litre containers.

IMPORTANT NOTICE TO CUSTOMER

*Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product, which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. **ALWAYS TEST FIRST.***
