OXYBRITE HEAVY DUTY SAFETY OXYGEN BLEACH

MATERIAL & FUNCTION

OXYBRITE is a free flowing bleaching powder which derives its outstanding whitening and brightening power from one of its constituent compounds which releases oxygen when in solution. **OXYBRITE** is ideal for removing those difficult stains by pre-soaking prior to washing. It will remove organic stains including grass stains, food & beverage stains and general soiling. The brightening and whitening power of your laundry detergent can be boosted by the use of **OXYBRITE**.

OXYBRITE, being oxygen based is classified as a safety bleach. It is safe to use on coloured materials guaranteeing no loss of colour and will not cause yellowing of synthetic fabrics, (which will happen with chlorine based bleaches).

In addition to incredible whitening and bleaching properties **OXYBRITE** has an in-built sanitizing/disinfecting function and contains optical brighteners to add brightness to clothes.

APPLICATION

Pre-soaking (Heavy stains) - Add 1 - 2 cups (150 - 300gms) of **OXYBRITE** per 10 litres of hot water and allow to soak overnight. Add approximately 2.5 – 5 kg clothes per 10 litres of water

General Washing - To maintain whiteness & brightness add 10 gms of **OXYBRITE** per kg (1/2 cup per 7 kg clothes) of clothes into the main wash cycle of the machine at a warm temperature level.

Commercial Washing: Use Hydrogen Peroxide as per technical bulletin or use 5 gms **OXYBRITE** per kg dry weight of clothes

PACKAGING

5 kg, 15kg, 25kg, & 200kg containers.

IMPORTANT NOTICE TO CUSTOMER
