WW1623

Waste Water Odour Prevention

Product Description

WW1623 solution controls odour forming compounds in waste water treatment systems, thereby preventing their release to the atmosphere.

Product Benefits.

- Prevents the odor problem at its source.
- Prevents corrosion due to Hydrogen Sulfide
- Reduce BOD in Effluent Systems
- Stimulate bacteria activity in Aerobic systems.
- Non hazardous.
- Extremely low maintenance
- Can also be used in Anaerobic and stagnant systems

Application

- WW1623 can be used in all Wastewater systems where odour problems are experienced.

Features

- Ready to use liquid
- Easy to use

- Compatible with Metal salts programs
- Does not add solids to the system.

Dosage requirements

- Dosage rates will vary depending on sulfide loading. Dose 8ppm of WW1623 for each ppm of sulfides in the feed or bulk water to start.

Monitoring

- Check ORP levels and increase dosage to maintain suitable ORP level.
- Optimum pH is between 6 and 8 pH units.

Handling and Storage.

- Read the label and Material Safety Data Sheet for complete handling information before using this product.
- WW1623 may be stored up to one year.

Quality

- Environex International is licensed as a Quality Endorsed Manufacturing Company under ISO9001.
