SPRAY CLEAN

CHLORINATED DISHWASHING MACHINE DETERGENT

MATERIAL & FUNCTION

SPRAY CLEAN is a powdered, non-foaming detergent containing chlorine which has been formulated for use in domestic and commercial automatic dishwashing machines. It is formulated for maximum effectiveness, particularly where difficult to remove contaminants such as where traces of egg, custard, lipstick, tannin and heavy grease are involved.

It will sterilize all articles during the washing process and will not be affected by hard water conditions. It is suitable for all types of cutlery and crockery including melamine goods.

APPLICATION

Scrape all food particles from plates and then change the detergent tank with 3 grams per litre of **SPRAY CLEAN** in water with mixing. At approximately every 4 racks, add 1 tablespoon of **SPRAY CLEAN** to keep detergency at its optimum level.

***Note:** Smaller quantities may be required for domestic dishwashing machines.*

CAUTION

SPRAY CLEAN is a corrosive powder containing sodium hydroxide. Wear goggles and rubber gloves. Operators should refer to the MSDS for safety precautions.

PACKAGING

4 kg pail, 15 kg bags & 18 kg pail.

IMPORTANT NOTICE TO CUSTOMER

*Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. **ALWAYS TEST FIRST.***
