VAT SAN

ACIDIC CLEANER/SANITISER

FUNCTION

VAT SAN is a highly active liquid acidic sanitiser designed specifically for use in food preparation and processing areas. It may be used to clean equipment such as milk holding vats and silos, milking machines, food preparation tanks and processing pumps and pipe work. The acid base provides efficient removal of milkstone, hard water scale and iron staining while the broad spectrum disinfectant provides good microbial control. The acidic cleaning action is also enhanced by a synergistic detergent system built into the product. **VAT SAN** does not contain any Iodine or Chlorine.

APPLICATION

In milk harvesting and storage equipment use **VAT SAN** at a dilution of 2 -5 mls per litre depending on water conditions. For hand cleaning operations and use in CIP circuits use **VAT SAN** at 15 – 25 mls per litre. Cleaning temperatures of up to 60 degrees Celsius are recommended with a contact time of 15 – 30 minutes. All equipment should be thoroughly rinsed with potable water after cleaning.

SAFETY INSTRUCTIONS

Wear rubber gloves and safety glasses when handling **VAT SAN** as it is acidic. Avoid contact with skin and eyes. If in contact wash off immediately with water. If swallowed, DO NOT induce vomiting, give a glass of milk or water and seek medical advice. In case of emergency contact Poisons Information Centre. A full Material Safety Data Sheet is available on request and should be kept on hand at all locations where this product is in use.

PACKAGING

15, 110 & 200 litre drums.

IMPORTANT NOTICE TO CUSTOMER

Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. ALWAYS TEST FIRST.
