ASF SOUR

MATERIAL & FUNCTION

ASF SOUR contains 1000 gms/kg of Ammonia Silico Fluoride. It is used in commercial laundry washing programs.

APPEARANCE

A white crystalline salt

APPLICATION

Always add to the final rinse to neutralize any carry over of alkalinity from soaps, detergents and bleaches. This neutralizing process eliminates any yellowing of the garments.

ASF SOUR is used at rate of 60 grams to 57 kgs of dry weight of garments in the final rinse cycle of 4 minutes. The pH of the water extracted should be between 6.5 -7.0.

CAUTION

This product is poisonous if taken internally. Please refer to Material Safety Data Sheet for further safe handling information.

PACKAGING

25 Kilogram bags.

IMPORTANT NOTICE TO CUSTOMER

*Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. **ALWAYS TEST FIRST.***
