## ENVIROSEAL PLUS WATER-BASED STAIN REPELLENT

### MATERIAL & FUNCTION

**ENVIROSEAL PLUS** has been developed as a water based penetrating sealer for use on most porous surfaces such as concrete or clay pavers, sandstone, limestone, travertine or re constituted products. It has been developed to avoid the strong odours associated with solvent based sealers. Some darkening of the treated surface may occur with the use of this product. A small test area is recommended.

### APPLICATION

Apply 2 coats. Apply first coat, then apply second coat whilst first coat is still damp to ensure good penetration of the second coat.

Coverage: 8-12 sq m per litre per coat.

Clean up any spills or soiling material within 2-4 hours

### DIRECTIONS FOR USE

Ensure area to be sealed is clean and dry. Do not apply to surfaces that are over 30 degrees. Newly laid surfaces should be left to dry for a minimum of 48 hours prior to sealing. Using a lambswool applicator, apply one coat of **ENVIROSEAL PLUS** ensuring there are no pools or puddles.

These should be wiped away as you go. Allow overnight for final curing before using the surface. Clean-up applicator in water. After sealing we recommend routine cleaning is carried out with Environex REFRESH. Re-sealing should be done every 2-3 years. This will be necessary more often in high traffic areas.

**CAUTION:** Do not apply with a spray. Aerosol is toxic by inhalation.

### PACKAGING

1 Litre, 5 Litre, 15 Litre & 200L containers.

### IMPORTANT NOTICE TO CUSTOMER

*Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user. ALWAYS TEST FIRST.*
