REFRESH is a light duty pH neutral detergent concentrate for routine daily/weekly cleaning of sealed surfaces. REFRESH is compatible with and will not affect the stain resistant properties of Environex Sealers. REFRESH will gently clean and condition ENVIRONEX sealed surfaces ensuring longer sealer life. REFRESH is designed for use in warm or hot water and will remove and clean food deposits, general dirt, soil and grime build-up.

APPLICATION: Sweep or vacuum floor thoroughly before cleaning with REFRESH. Dilute REFRESH in warm or hot water at the rate of 1:50 ml/litre (depending on how dirty the floor is) and mop onto the floor. Rinse sealed floor with clean warm to hot water to finish.

NOTE: REFRESH is not designed for pre-cleaning prior to sealing with ENVIRONEX sealers, HD CLEANER is recommended for this purpose.

MATERIAL & FUNCTION

REFRESH is a pH neutral detergent with a pleasant fragrance for use on stone and tiled floors and is designed as a routine cleaning and maintenance product. It is designed to be used as a neutralizing detergent after the use of **ENVIRONEX HD CLEANER**, **GREEN DEVIL** or **ANTI-EFF** and also as a routine cleaner for sealed surfaces. Sealed surfaces can be adversely affected by harsh cleaners such as acids or caustic. A neutral cleaner will ensure the sealer retains its integrity for years to come.

DIRECTIONS FOR USE

Sweep or vacuum floor before shampooing. **REFRESH** should be used at a dilution rate of 5ml per litre flooded onto the surface and then mopped or broomed off. Any difficult stains can be removed using **ENVIRONEX HD CLEANER** but the area cleaned may have to be re-sealed.

10 litres of diluted **REFRESH** should be sufficient to clean approximately 60 - 80 square metres of slate or tiled floors.

PACKAGING

2 Litre & 5 Litre containers.

IMPORTANT NOTICE TO CUSTOMER
